SCHWEIZER receives NADCAP accreditation for electronics

- **Nadcap recognises SCHWEIZER for its commitment to continual improvement in aerospace quality**

Schramberg, May 27, 2019 – SCHWEIZER is pleased to announce that it has received Nadcap accreditation for electronics.

The aim of the Nadcap accreditation programme is to assess process capability for compliance to industry standards, best practices and customer requirements. By achieving Nadcap accreditation, SCHWEIZER has demonstrated its compliance. This accreditation is highly regarded in the aviation industry and a precondition for major industry players in order to be admitted as a strategic supplier “After our successful entry into the Aviation market a couple of years ago, the NADCAP certification is a very important milestone for us and underlines our strategic focus for further growth in this market segment”, says Christian Rössle Vice President Sales & Marketing at Schweizer Electronic AG.

“Nadcap accreditation is universally acknowledged as a significant undertaking. Validating compliance to industry standards, best practices and customer requirements, Nadcap has long been incorporated by the aerospace industry into their risk mitigation activity. Congratulations are therefore due to SCHWEIZER as their hard work has resulted in achieving Nadcap accreditation for their printed circuit boards”, commented Michael J. Hayward, Executive Vice President and Chief Operating Officer at the Performance Review Institute.

The international aviation sector is amongst the industries with the highest growth rates, and according to experts this trend will continue in the future. Rising demand for mobility and replacements of older airplanes with high fuel consumption by models of the latest, low-noise and fuel-efficient aircraft generation are key growth drivers in this area.

SCHWEIZER offers innovative PCB solutions for radar-, high current- and high temperature applications as well as PCBs to support miniaturisation and the reduction of weight and CO₂ emissions. Since the aviation industry follows similar objectives, and in view of its own high quality standards, the company has entered the aviation sector and has delivered series orders to customers in this

industry since 2016, with an upward trend in turnover and order book since then. The Nadcap accreditation will open the door to new customers in this business sector

About Nadcap

Created in 1990 by SAE International, Nadcap is administered by the not-for-profit Performance Review Institute (PRI). PRI is a global provider of customer-focused solutions designed to improve process and product quality by adding value, reducing total cost and promoting collaboration among stakeholders in industries where safety and quality are shared goals. PRI works closely with industry to understand their emerging needs and offers customized solutions in response. Learn more at www.p-r-i.org or contact PRI at PRI@p-r-i.org

About Schweizer

Schweizer Electronic AG stands for state-of-the-art technology and consultancy competence. SCHWEIZER's premium printed circuit boards and innovative solutions and services for automotive, solar, industry and aviation electronics address key challenges in the areas of Power Electronics, Embedding and System Cost Reduction. Its products are distinguished for their superior quality and their energy-saving and environmentally-friendly features. Together with its partners WUS Printed Circuit (Kunshan) Co., Ltd., Meiko Electronics Co. Ltd. and Elekonta Marek GmbH & Co. KG the company offers in its division electronics cost- and production-optimised solutions for small, medium and large series. Together with its partner Infineon Technologies AG, SCHWEIZER plans to jointly tap the chip embedding market in future.

The company was founded by Christoph Schweizer in 1849 and is listed at the Stuttgart and Frankfurt Stock Exchanges (ticker symbol „SCE“, „ISIN DE 000515623“).
